EDUCATION

Vellore Institute of Technology, Bhopal

B.Tech in Computer Science and Engineering with specialization in AI-ML

2022 – 2026

CGPA: **7.86** / 10

PROFESSIONAL SUMMARY

Computer Science student specializing in AI & ML with strong skills in Python and Data Structures. Hands-on experience in machine learning projects including CNN and predictive modeling. Passionate about building scalable applications and exploring technologies like Web3 and Generative AI.

TECHNICAL SKILLS

Languages: Python, C++

Frameworks/Libraries: TensorFlow, PyTorch, Scikit-learn, OpenCV, LangChain, NLTK, Transformers

Databases/Cloud: MySQL, SQLite3, AWS

Developer Tools: GitHub, VS Code, Cursor, Collab

Operating Systems: Linux, Kali Linux, Windows

PROJECTS

Terrain AI — Real-Time Satellite Imagery Classifier

[Deployment link](#)

- Built an **AI-powered platform** to analyze real-time satellite imagery and classify terrain types using a **TensorFlow-based EuroSAT model**.
- Implemented real-time tile fetching from **ArcGIS/ESRI APIs** and achieved **sub-100ms inference latency** for terrain predictions.
- Designed an interactive dashboard with **confidence scoring, history tracking, and geolocation support** for enhanced user experience.

Granite — AI-Powered Document Retrieval (RAG)

[GitHub](#)

- Designed and implemented a **Retrieval-Augmented Generation (RAG)** framework using **LangChain** and **Docling** to enable contextual document-based Q&A and semantic search.
- Built a **text-embedding pipeline** leveraging OpenAI models to encode and index **100+ research and technical documents**, improving semantic recall and answer precision by **20%**.
- Reduced average query response time from **2.8s to 1.8s (35% faster)** through optimized chunk segmentation, vector indexing, and asynchronous retrieval logic.

HireLens — AI Resume Screening & Job Matching Platform

[Deployment Link](#)

- Developed an **AI-powered recruitment platform** that analyzes resumes and matches candidates to job roles using **Natural Language Processing (NLP)** and semantic similarity techniques.
- Built a resume parsing and ranking pipeline using **Python, Scikit-learn, and Transformers**, improving candidate shortlisting efficiency by **40%**.
- Implemented features such as **skill extraction, ATS-style scoring, and job recommendation** with an interactive dashboard for recruiters.

EXPERIENCE

Edunet Foundation (AICTE–IBM SkillsBuild) — Fundamentals of Web Development [Project Link](#)

[Certificate](#)

Aug 2025 – Oct 2025

- Completed a 6-week internship focused on **full-stack web development** and responsive UI design
- Built a productivity web application **Smart Study Planner** using **HTML, CSS, JavaScript, and React**, improving task efficiency by **30%**
- Integrated dynamic features and **API-based functionalities** for real-time user interaction
- Deployed the application using **GitHub Pages** and maintained version control with **Git/GitHub**

CERTIFICATIONS

- **Generative AI with IBM Watsonx** — IBM Skills Network (2025)

[Certificate](#)
